

SANKET VISHNU THOK

Pune | 9834710483 | thoksanket@gmail.com | [LinkedIn](#) | [Portfolio](#)

Professional Summary

Results-oriented Software Engineer with 2+ years of experience in full-cycle software development. Expert in backend development, API integration, and system observability using Java Spring Boot, and Grafana. Proven track record of optimizing workflows using Azure DevOps and delivering scalable solutions in the tech domain. Recipient of the Bravo Award for technical excellence and performance.

Technical Skills

Languages & Frameworks: Java, Spring Boot, Microservices, RESTful API, Cloud Computing, AWS.

Tools & DevOps: Git/GitHub, Azure DevOps, Grafana (Observability), Linux, Eclipse, IntelliJ.

Databases: MySQL, PL/SQL.

Experience

Tech Mahindra Ltd

Pune, India | March 2024 – Present

Software Engineer | March 2025- Present

- Engineered backend solutions and handled API integrations, ensuring seamless data flow between disparate systems.
- Enhanced system observability by integrating data sources with Grafana, providing real-time monitoring and actionable insights for system performance.
- Collaborated with cross-functional teams to streamline the full SDLC, utilizing Azure DevOps for efficient development, testing, and deployment cycles.

Associate Software Engineer | March 2024 - March 2025

- Gained specialized expertise in Fintech products, including Finastra FTI (Trade Innovation), FCC (Financial Crime Compliance), and FCM.
- Developed and customized secure software modules using Java and Spring Boot, contributing to successful system integration tasks.

Achievement: Recognized with the Bravo Award for exceptional contribution and performance during the training and project execution phase.

UMS Tech Labs

Nashik, India | March 2023 – August 2023

Junior Software Engineer

- Developed and maintained software applications using Java, servlets, JavaScript over Google App Engine, Appscript, and other technology stacks.
- Wrote scripts to automate tasks across Google Workspace applications.
- Worked on domains such as API integration (Google API, Exotel API, Zoho CRM), Google Workspace add-ons, Chrome Extensions, and workspace automation.

Education

Bachelor of Technology — Computer Science and Engineering | CGPA of 8.47

Sandip University

Graduated: July 2023

Nashik, Maharashtra

Projects

Cloud-Based Employee Management System | AWS, EC2, RDS, S3, DynamoDB

- Architected and deployed a highly available multi-tier web application to manage employee data and media assets.
- Configured **AWS EC2** instances for compute capacity and **RDS** for relational database management, ensuring data consistency.
- Implemented **IAM roles** for secure access control and utilized **S3** for efficient storage of static user assets.

Collegify Connect (University Platform) | Java, MySQL, HTML, CSS

- Developed a full-stack centralized platform to streamline operations for university clubs and associations.
- Engineered the backend logic using **Java** to handle complex data relationships and utilized **MySQL** for robust database management.
- Designed a responsive front-end interface using **HTML/CSS/JavaScript**, improving accessibility for student users.

Key Competencies

Agile & SDLC: Experienced in Agile/Scrum methodologies and full software development lifecycle management using Azure DevOps.

System Observability: Proficiency in monitoring production environments and optimizing system performance using Grafana dashboards.

Cross-Functional Collaboration: Proven ability to work with testing, deployment, and product teams to deliver complex Fintech solutions.

Problem Solving: Recipient of the Bravo Award for rapid troubleshooting and technical excellence in project execution.
